Logarithmically Periodic Antennas -

1. This Office has an operational requirement for a logarithmically periodic antenna system covering the range of 30 to 1000 megacycles. The attached proposal and cost analysis from [redacted] covers the development and fabrication of the antenna system.

2. [redacted] has extensive laboratory facilities and experience in logarithmically periodic antenna structures and is believed to be capable of performing this work. We have carefully reviewed this proposal and it is considered fair and reasonable.

3. It is requested that contractual action be undertaken to accept this proposal in accordance with the attached documents. Attached is Requisition No. MSB 59-455 indicating that the allotment to be charged for this work is 9/7900-50-600. Funds in the amount of \$35,521.00 have been encumbered for this project. The association of the Agency with the contract and the equipment is classified SECRET. The actual equipment and the engineering reports, however, are UNCLASSIFIED. The project engineer for the work is [redacted]

Attachments:

- 1) Requisition No. MSB 59-455
- 2) Contractor's Proposal dated 22 December 1958
- 3) Cost and Price Analysis dated 22 December 1958
